Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the Three and Nine Month Periods ended September 30, 2017

1. Nature of Operations

The Company's business is to identify, acquire, explore and develop petroleum, natural gas, and shale gas properties. The Company primarily operates in the Co-Operative Republic of Guyana ("Guyana") and the Republic of Namibia ("Namibia"). The head office of the Company is located at 181 Bay Street, Suite 320, Toronto, ON, Canada, M5J 2T3.

As used herein, the term "Company" means individually and collectively, as the context may require, Eco (Atlantic) Oil and Gas Ltd. and its subsidiaries.

These condensed consolidated interim financial statements were approved by the Board of Directors of the Company on February 27, 2018.

2. Basis of Preparation and Going Concern

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") on a going concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair statement of results in accordance with IFRS have been included.

The ability of the Company to continue as a going concern depends upon the discovery of any economically recoverable petroleum and natural gas reserves on its licenses, the ability of the Company to obtain financing to complete development, and upon future profitable operations from the licenses or profitable proceeds from their disposition. The Company is an exploration stage company and has not earned any revenues to date. These condensed consolidated interim financial statements do not reflect any adjustments to the carrying value of assets and liabilities that would be necessary if the Company were unable to achieve profitable operations or obtain adequate financing.

There can be no assurance that the Company will be able to raise funds in the future, in which case the Company may be unable to meet some of its future obligations. These matters raise significant doubt about the Company's ability to continue as a going concern. In the event the Company is unable to continue as a going concern, the net realizable value of its assets may be materially less than the amounts recorded on its condensed consolidated interim statements of financial position.

The Company has accumulated losses of \$29,770,761 since its inception and expects to incur further losses in the development of its business.

3. Summary of Significant Accounting Policies

Statement of compliance

The Company has prepared these unaudited condensed consolidated interim financial statements in accordance with IAS 34, Interim Financial Reporting, using policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the IFRS Interpretations Committee ("IFRIC").

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the Three and Nine Month Periods ended September 30, 2017

3. Summary of Significant Accounting Policies (continued)

Statement of compliance (continued)

The policies applied in these condensed consolidated interim financial statements are based on IFRS issued and outstanding as of August 24, 2017, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these condensed consolidated interim financial statements as compared with the most recent audited consolidated financial statements of the Company as at and for the year ended March 31, 2017. Certain information and disclosures normally included in the audited consolidated financial statements prepared in accordance with IFRS have been omitted or are condensed. These unaudited condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended March 31, 2017.

Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending March 31, 2017 could result in restatement of these condensed consolidated interim financial statements.

Basis of consolidation

The condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiaries, Eco (Barbados) Oil and Gas Holdings Ltd., Eco Namibia Oil and Gas (Barbados) Ltd. (Barbados), Eco Guyana Oil and Gas (Barbados) Ltd., Eco (BVI) Oil & Gas Ltd., Eco Oil and Gas (Namibia) (Pty) Ltd. Eco Oil and Gas Services (Pty) Ltd, , Eco Atlantic Holdings Ltd., Eco Pan African Oil Holdings Ltd. Eco Atlantic Guyana Offshore Inc., Eco (Atlantic) Guyana Inc. and Pan African Oil Namibia Holdings (Pty) Ltd. ("PAO Namibia")(of which the Company owns 90%).

Critical accounting estimates

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively from the period in which the estimates are revised. The following are the key estimate and assumption uncertainties considered by management.

i) Impairment of assets

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. The recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value.

Critical judgments used in applying accounting policies

In the preparation of these condensed consolidated interim financial statements, management has made judgments, aside from those that involve estimates, in the process of applying the accounting policies. These judgments can have an effect on the amounts recognized in the condensed consolidated interim financial statements.

Notes to the Condensed Consolidated Interim Financial Statements (Unaudited)

For the Three and Nine Month Periods ended September 30, 2017

4. Future Accounting and Reporting Changes

The IASB issued new standards and amendments not yet effective.

IFRS 9, Financial Instruments (“IFRS 9”) was initially issued by the IASB on November 12, 2009 and issued in its completed version in July 2014, and will replace IAS 39, "Financial Instruments: Recognition and Measurement" (“IAS 39”). IFRS 9 replaces the multiple rules in IAS 39 with a single approach to determine whether a financial asset is measured at amortized cost or fair value and a new mixed measurement model for debt instruments having only two categories: amortized cost and fair value. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for financial years beginning on or after January 1, 2018. The Company is currently assessing the effects of IFRS 9 and intends to adopt on its effective date.

IFRS 15, Revenue from Contracts with Customers (“IFRS 15”) was issued by the IASB in May 2014 and clarifies the principles for recognizing revenue from contracts with customers. IFRS 15 will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively (i.e. service revenue and contract modifications) and improve guidance for multiple-element arrangements. IFRS 15 is effective for periods beginning on or after January 1, 2018 and is to be applied retrospectively. The Company's preliminary assessment of IFRS 15 has determined there will not be a significant impact to the consolidated financial statements as a result of the adoption of this standard.

IFRS 16, Leases (“IFRS 16”) was issued by the IASB in January 2016 and specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. An entity applies IFRS 16 for annual periods beginning on or after January 1, 2019. Earlier application is permitted if IFRS 15 Revenue from Contracts with Customers has also been applied. A lessee shall either apply IFRS 16 with full retrospective effect or alternatively not restate comparative information but recognize the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application. The Company is currently assessing the effects of IFRS 16 and intends to adopt on its effective date.

5. Short-term Investments

The Company's short-term investments comprise interest bearing deposits with its primary bank of \$49,818 (March 31, 2017 - \$49,818), which are held as collateral for credit-card lines of credit.

6. Accounts receivable and prepaid expenses

Included in account receivable and prepared expenses is a receivable (US\$576,580) in respect of the sale of the Company's Ghana operations, which took place during the year ended March 31, 2017.

- ii. In accordance with the Guyana Petroleum Agreement, the Eco (Atlantic) Guyana Inc holds a 40% working interest in the Guyana Licenses and Tullow Oil plc (“Tullow”) holds the balance 60% interest. Under the Guyana Petroleum Agreement, Tullow will act as operator.
- iii. On June 8, 2017, in light of recent discoveries in the region by other petroleum explorers and the advancement of the interpretation of the Orinduik Block that is encouraging to the Company, Tullow and the Company approved a circa 2,550 km² seismic survey on the Company’s Orinduik Block. Tullow carried US\$1,250,000 of the Company’s share of costs of the 3D survey.
- iv. On September 26, 2017, the Company’s subsidiary, Eco Atlantic (Guyana) Inc. (“Eco Guyana”), entered into an option agreement that provides Total E&P Activités Pétrolières, (a wholly owned subsidiary of Total SA) (“Total”) with an option to acquire a 25% Working Interest in the Orinduik Block from Eco Guyana (the “Option”). Pursuant to the Option Agreement, Total made an immediate payment of US\$1 million for the Option (the “Option Fee”) to Farm-in to the Orinduik Block for an additional payment in cash of US\$12.5 million to earn the 25% Working Interest. The exercise of the Option must be made within 120 days from delivery to Total of the processed 3D seismic. The survey acquisition was completed on September 5, 2017 and processing is expected to be completed in January 2018.

12. Asset Retirement Obligations (“ARO”)

The Company is legally required to restore its properties to their original condition. Estimated future site restoration costs will be based upon engineering estimates of the anticipated method and the extent of site restoration required in accordance with current legislation and industry practices in the various locations in which the Company has properties.

As of December 31, 2017 and 2016, the Company did not operate any properties, accordingly, no ARO was required.

13. Capital Management

The Company considers its capital structure to consist of share capital, deficit and reserves. The Company manages its capital structure and makes adjustments to it, in order to have the funds available to support the acquisition, exploration and development of its licenses. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company’s management to sustain future development of the business.

The Company is an exploration stage entity; as such the Company is dependent on external equity financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company’s approach to capital management during nine month period ended December 31, 2017. Neither the Company nor its subsidiaries are subject to externally imposed capital requirements.

The Company’s objective when managing capital is to safeguard the Company’s ability to continue as a going concern. The Company’s ability to raise future capital is subject to uncertainty and the inability to raise such capital may have an adverse impact over the Company’s ability to continue as a going concern (*Note 2*).

14. Risk Management

i) Credit risk

The Company's credit risk is primarily attributable to short-term investments and amounts receivable. The Company has no significant concentration of credit risk arising from operations. Short-term investments consist of deposits with Schedule 1 banks, from which management believes the risk of loss to be remote. Amounts receivable consist of advances to suppliers and harmonized sales tax due from the Federal Government of Canada. Government receivable consists of value added tax due from the Namibian government which has been collected subsequent to year end. Management believes that the credit risk concentration with respect to amounts receivable is remote. The Company does not hold any non-bank asset backed commercial paper.

ii) Interest rate risk

The Company has cash balances, cash on deposit and no interest bearing debt. It does not have a material exposure to this risk.

iii) Liquidity risk

The Company ensures, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, without incurring unacceptable losses or harm to the Company's reputation.

As at December 31, 2017, the Company had cash and cash equivalents and on deposit of \$14,376,535. (March 31, 2017 - \$6,088,567) and short-term investments of \$74,818 (March 31, 2017 - \$49,818) to settle current liabilities of \$434,034 (March 31, 2017 - \$800,629).

The Company utilizes authorization for expenditures to further manage capital expenditures and attempts to match its payment cycle with available cash resources. Accounts payable and accrued liabilities at December 31, 2017 all have contractual maturities of less than 90 days and are subject to normal trade terms.

iv) Foreign currency risk

The Company is exposed to foreign currency fluctuations on its operations in Namibia, which are denominated in Namibian dollars. Sensitivity to a plus or minus 10% change in rates would not have a significant effect on the net income (loss) of the Company, given the Company's minimal assets and liabilities designated in Namibian dollars as at December 31, 2017.
